

Apach Wide Crown Staplers Available Now

Introducing the Apach 16 Ga. Wide Crown Staplers. We are offering 3 models for the Senco/Duo-Fast, Bostitch, and Paslode type 16 Ga Wide Crown Staples. A perfect replacement for many of the discontinued models.

The compact and lightweight body is based off our proven medium crown stapler design. The magazine will hold 160 staples, and accepts 3/4" to 1-1/2" leg fasteners. This allows for a lighter tool, weighing just 5.3 lbs. The quick release nose helps to easily clear jams, and the metal magazine guide helps reduce wear. The tool is well balanced with a soft rubber handle to help prevent fatigue. There is an optional sequential fire trigger available (#34903501A).

These staplers are capable of handling heavy duty applications ranging from Sheathing, Wire Lathe, Trusses, Pallets, Crating, and General Construction. More information below:

Models available:
